Voltage detectors / Medium-voltage detector – for indoor use

VTO-U

Analog voltage detector without pole
Medium voltage - Optical

Voltage presence is indicated by LED lights.
Self-checking is performed via an integrated piezoelectric generator.
Operates without a battery.
For indoor use with an insulating pole suitable for the detector's rated voltage.
Connection to the pole via a universal head.
Supplied with a metal case for storing and transporting the voltage detector.

CE

31001 VTO-U
Voltage detector without pole

Code	Ref.	Voltage ranges	Frequency
640200	VTO-5/36-U	5 - 36 kV	50 / 60 Hz
640205	VTO-5/66-U	5 - 66 kV
